Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136 (a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on Feb 21, 2003
- 2a) ☐ This action is FINAL. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11; 453 O.G. 213.

Disposition of Claims

DETAILED ACTION

Oath/Declaration

1. The oath or declaration is defective. A new oath or declaration in compliance with 37 CFR 1.67(a) identifying this application by application number and filing date is required. See MPEP §§ 602.01 and 602.02.

The oath or declaration is defective because: the copy of the names of the inventors and the dates is unclear in that the names are not clearly printed and are illegible.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-2 are is rejected under 35 U.S.C. 102(b) as being anticipated by Hull.

Hull discloses a vehicle bed assembly comprising a front panel K'; a first side panel W; a second side panel W; a floor panel A which is coupled to the first and to the second side panels and which is further coupled to the front panel; a first rail P which receives and which is linearly coextensive to the first side panel, the first rail coupling the first side panel to the front panel; and a second rail P which is substantially identical to the first rail and which receives and which is linearly coextensive to the second side panel, the second rail coupling the second side panel to the

Art Unit: 3612

front panel. Also, an end cap member R is disposed within the first rail and selectively couples the first side panel to the front panel. Each of the first and second side panels are thought to be corrugated (Figure 1).

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103© and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

5. Claims 5-7 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hull as applied to claim 2 above, and further in view of Carr.

Hull lacks first and second reception members.

Art Unit: 3612

Carr teaches a vehicle bed assembly comprising a front panel (not shown); a first side panel; a second side panel; and a floor panel which is coupled to the first and to the second side panels and which is further coupled to the front panel. In addition, Carr teaches a first reception member 16 which is coupled to the first side panel and a second reception member 16 which is coupled to the second side panel and which is substantially identical to the first reception member. The first reception member comprises a first portion 29 which forms a member reception pocket having an axis of symmetry which is parallel to a plane containing the first side panel; and a second stem portion 30 which forms an acute angle with the axis of symmetry.

It would have been obvious to one of ordinary skill in the art at the time the invention was made to have provided first and second reception members as taught by Carr upon the side panels of Hull in order to allow cargo in the bed to be braced or restrained.

Allowable Subject Matter

6. The indicated allowability of claims 1-7 is hereby withdrawn in view of the newly discovered reference(s) to Hull. Rejections based on the newly cited reference(s) follow.

7. Claims 8-12 and 14-19 are allowed.

Art Unit: 3612

8. Claims 3-4 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Response to Arguments

9. Applicant's arguments with respect to the claims have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

10. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The cited references show other vehicle bed assemblies similar to that of the current invention.
